

Executive Summary – Ferns and Petals Sales Analysis

This dashboard analyzes **1,000 customer orders** in 2023, providing actionable insights into **sales trends, customer behavior, and product performance** across major gifting occasions.

Key Findings

- **Revenue Performance:** Total revenue reached ₹35.2 lakh, with an average customer spend of ₹3,520 per order.
- **Delivery Efficiency:** Orders were delivered in an average of 5.5 days, indicating scope for faster fulfillment to improve customer satisfaction.
- **Seasonality:** Sales peaked in March (Holi) and August (Raksha Bandhan), confirming strong seasonal demand patterns.
- **Top Products:** The *Magnam Set* and *Quia Gift* emerged as leading products, each generating over ₹1.2 lakh in revenue.
- **Customer Geography:** Imphal, Dhanbad, and Kavali were the top cities by order volume, highlighting regional demand clusters.
- **Category Insights:** Colors and Cakes dominated revenue, while categories like Mugs and Plants showed lower traction.
- **Occasion Analysis:** Raksha Bandhan and Anniversaries drove the highest revenue, while Diwali and Valentine's Day underperformed relative to expectations.
- **Order Quantity vs Delivery Time:** Larger orders showed slightly longer delivery durations, suggesting operational bottlenecks.

Business Impact

- **Revenue Optimization:** Targeting high-performing categories (Colors, Cakes) and top cities could increase sales by 10–15%.
- **Operational Efficiency:** Reducing delivery times by even 1 day could significantly improve customer satisfaction scores.
- **Seasonal Strategy:** Strengthening marketing campaigns around Raksha Bandhan and Holi can maximize peak demand.
- **Product Focus:** Expanding inventory for top products and bundling underperforming items with popular ones may boost overall sales.
